

GameFocus Beta

Known Issues & Limitations | Developer: **FX Creatives** (A branch of Formula Xperience)

This beta version is stable and fully functional.

However, some features are intentionally unavailable or may behave differently while development continues.

KNOWN ISSUES & LIMITATIONS

1. Cloud Sync

STATUS: COMING SOON

Cloud backup and multi-device synchronization are currently under active development and will be released in an upcoming version.

2. Google Sign-In

STATUS: COMING SOON

Google account authentication is currently disabled and will be introduced in a future update.

3. Battery Optimization

DEVICE BEHAVIOR

Some Android devices aggressively stop background services. If Game Detection stops working, please disable battery optimization for GameFocus in system settings.

4. Manufacturer Restrictions

OS CUSTOMIZATION

Devices from manufacturers such as **Xiaomi, Oppo, Vivo, Huawei, Tecno, and Infinix** may require additional background autostart and permission settings for continuous session tracking.

5. Play Store Distribution

DIRECT DISTRIBUTION

This beta is distributed directly via APK for testing purposes and is not yet available directly on Google Play.

FUTURE UPDATES

- ✦ Cloud Sync
- ✦ Google Sign-In
- ✦ Multi-device synchronization
- ✦ Improved Analytics
- ✦ More achievements
- ✦ Additional customization
- ✦ Performance improvements

Thank you for your patience!

We appreciate your support while **GameFocus** continues to evolve.

Every bug report and suggestion directly helps make the application better.
